

Miller & Tischler, P.C., (“M&T”) represents survivors of catastroph

rophic brain and spinal injuries, their families and their professional service providers who are having difficulty pursuing their entitlement to receive No-Fault benefits for injuries sustained in motor vehicle accidents. This includes both auto negligence and wrongful death actions.

We assist our clients in learning about and obtaining all of the benefits to which they are entitled and help them understand how their No-Fault insurance may coordinate with other kinds of insurances they have whether it be private health insurance, Medicaid, Medicare, Workers’ Compensation, or Veterans benefits.

M&T is committed to providing correct, meticulous and thoughtful advice to its clients. We aggressively represent our client’s positions and have an unwavering commitment to excellence. Our attorneys possess the highest standards of integrity and diligence. M&T prides itself on being responsive, compassionate and accessible to our clients. We not only have the sophistication normally reserved for the largest of law firms, but we also demonstrate a peerless level of personal attention. That’s why our clients come to us from all over the state of Michigan.

We believe in thorough, timely, cost-effective counsel provided by experienced attorneys, furthered by the use of para-legals and supported by a highly skilled staff. We feel strongly that clients should expect and receive a timely and accurate response to their needs. If you call your M&T attorney, you will always be able to speak directly to him or her regarding the status of your matters and concerns. After all, our commitment is to your service.
